

Locked Device Forensics

Quick Reference Card for Android & iOS

ANDROID LOCKED DEVICE METHODS

Method	Requirements	Success Rate	Data Access
EDL Mode (Qualcomm)	Physical access, some devices	80%	Full disk (encrypted)
Recovery Mode	Physical access	35%	Limited files
ADB WiFi Persistence	Network access	40%	Full via ADB
Lockdown Certificate	Trusted PC access	60%	Full via ADB
MTP/MSC Access	USB connection	45%	Media files
Bluetooth Car Kit	BT adapter	40%	Contacts, calls
Smart Watch Sync	Watch access	60%	Notifications
SIM Extraction	SIM removal	95%	SIM data
Google Takeout	Account access	85%	Cloud data

Android Quick Commands

Task	Command
Check ADB devices	<code>adb devices -l</code>
Check fastboot	<code>fastboot devices</code>
Check EDL mode	<code>lsusb grep 9008</code>
Enter EDL (fastboot)	<code>fastboot oem edl</code>
Network ADB scan	<code>nmap -p 5555 192.168.1.0/24</code>
MTP file list	<code>mtp-files</code>
Dump partitions	<code>adb shell cat /proc/partitions</code>
Boot count	<code>adb shell settings list global grep boot</code>
Package list	<code>adb shell pm list packages -3</code>

iOS LOCKED DEVICE METHODS

Method	Requirements	Success Rate	Data Access
Lockdown Certificate	Trusted PC	75%	Backup, sync
iTunes Backup	Existing backup	90%	App data, media
iCloud Access	Apple ID credentials	85%	Cloud sync data
DFU + Checkm8	iPhone 5s-X only	80%	Jailbreak, FS access
WiFi Sync	Previously enabled	25%	Sync data
Siri Lock Screen	iOS < 13, Siri on	20%	Limited info
Apple Watch	Watch access	50%	Synced data
SIM Extraction	SIM removal	95%	SIM contacts, SMS
CarPlay Cache	Vehicle access	35%	Contacts, nav

iOS Quick Commands

Task	Command
List devices	<code>idevice_id -l</code>
Device info	<code>ideviceinfo</code>
Check pairing	<code>idevicepair validate</code>
Create backup	<code>idevicebackup2 backup ./output/</code>
Mount filesystem	<code>ifuse /mnt/iphone</code>
DFU check	<code>irecovery -q</code>
Lockdown location	<code>/var/db/lockdown/</code>
Backup location	<code>~/Library/Application Support/MobileSync/Backup/</code>
Install checkra1n	<code>brew install --cask checkra1n</code>

DFU Mode Entry

Device	DFU Entry Method
iPhone 8 and later	Vol Up → Vol Down → Hold Power until black → Power+Vol Down 5s → Vol Down 10s
iPhone 7/7 Plus	Hold Power + Vol Down for 8s → Release Power, hold Vol Down
iPhone 6s and earlier	Hold Power + Home for 8s → Release Power, hold Home

ESSENTIAL TOOLS

Tool	Platform	Purpose	Install
ADB	Android	Debug interface	apt install android-tools-adb
Fastboot	Android	Bootloader	apt install android-tools-fastboot
libimobiledevice	iOS	iOS interface	apt install libimobiledevice-utils
ifuse	iOS	Mount iOS	apt install ifuse
irecovery	iOS	DFU/recovery	apt install libirecovery-utils
QFIL/EDL	Android	Qualcomm flash	qualcomm.com
checkra1n	iOS	Bootrom exploit	checkra.in
Heimdall	Samsung	Odin alternative	apt install heimdall
MTP Tools	Android	Media transfer	apt install mtp-tools
SIM Tools	Both	SIM extraction	pip install pysim

KEY FILE LOCATIONS

Data Type	Android Path	iOS Path
ADB Lockdown	~/.android/adbkey*	/var/db/lockdown/*
Backups	/sdcard/backups/	~/Library/.../MobileSync/Backup/
SMS	/data/data/com.android.providers.telephony/databases/sms.db	0017e5fb2ce.../sms.db
Contacts	/data/data/com.android.providers.contacts/databases/contacts_1.db	31bb7ba89147.../AddressBook.sqlitedb
Call Logs	/data/data/com.android.providers.contacts/databases/call_log_1.db	5a4935c78a52.../CallHistory.storedat
WiFi	/data/misc/wifi/wpa_supplicant.conf	N/A (keychain)
Browser	/data/data/com.android.chrome/	a357e695d341.../History.db
Keychain	/data/misc/keystore/	/var/Keychains/

LEGAL NOTICE

This reference is for authorized forensic investigations, security research, and educational purposes only. Always ensure proper legal authorization before attempting device access. Document all actions for chain of custody. Laws vary by jurisdiction - consult legal counsel before proceeding.
